—It is encouraging to know that there is a vast quantity of charity helf hidden under the veil of worldliness that covers our city. A notice in the APPRAL of Wednesday morning, calling attention to the sad condition of a Swiss family living up in the Gayoso House, had the effect of procuring all sorts of relief for that family. In the morning carly two Staters of Charity went up there: they were followed by two or three doctors, one of whom improvised a little subscription. Dozens of good ladles went to see the family during the day—each one conforring a mark of substantial charity, so that when the shades of evening fell, that hitherto almost abandoned samily were provided. A 81 have succeeded in getting a patent A granted me on the 16th day of August, 1870, on presses for hay and cotton, I now propose to place them before the public for general use. My invention is reduced down to simplicity, attength and drashflity so much that any set of held hands can work it with good success. I claim for my invention, over the Utley and all other presses, this, viz. My griping blocks which grip the upright from bars as soon as the levers are applied, hold fast and forces the follower down with great power; as soon as the power is taken off the blocks will slide down the bar perfectly loose, and ready for renewal of hold, which renders it entirely impossible to get out of order, a virtue which no other press has. The lever which I use, is a common straight lever applied direct to the griping blocks; my follower is run up by means of windlas and rope and is arranged to work very easy. All who may wish a press, royally, county or State rights, will apply to 3. F. Bowdy, No. 361 Front-street Memphis, who has the full right to sell and make titles, and will take pleasure in showing the press, which is situated in front of his office.
